Program Update

Thank you to all our partners that helped make World Rabies Day a success. We are nearing the mark of having 100 clinics involved in our program and we could not have reached this milestone without all of you promoting the cause. Thank you!

Welcome New Partners

Kindred Biosciences, Inc in Burlingame, CA
Loyal Companion Animal Care in Redmond, WA
The partnership we have with Merck Animal Health in the U.S. includes Rabies Free Africa information on all materials that the sales force hands out for the Nobivac® virus. If you see your local rep, you can let them know you are already part of the cause!

More clinics join the family each month. As you are out and about, please continue to share the Rabies Free Africa story. We are excited to continue working with you in 2019.

Beyond Vaccination
The Allen School is partnering with the Pacific Science Center to feature several of our faculty members in 2019 as part of the Science in the City, Global Health and Development Series.

For those of you who live in the greater Seattle area, we hope you can join us for one of these free events. We are working with them to see if we can live broadcast or record and share the talk. If this is of interest to you, let Christie know as the more people who express interest the greater likelihood it will happen!

All of the talks are on the second Tuesday of the month from 7-9pm at the Pacific Science Center.
