At **Rabies Free Africa** we are working to eliminate canine rabies worldwide. Rabies is the deadliest zoonotic disease on the planet. Every year more than 60,000 people die from rabies.

We are actively engaged in research that creates better vaccination programs around the world. **Rabies Free Africa** is a global partner in the World Health Organization **ZERO BY 30** initiative with a goal of eliminating human death from canine rabies by 2030.

Join people from across the country to create a world where no one dies from rabies.
